PROFILE SUMMARY

Adaptive Full-Stack Web Developer with a strong background in Laravel, React, Next.js, and Web ERP logic, paired with practical accounting experience. Experienced in building scalable systems like University Management (UGV) and dynamic E-Commerce/Inventory platforms. Skilled in system architecture, REST APIs, and prompt engineering to deliver secure, high-performance web applications.

WORK EXPERIENCE

Full-Stack Software Engineer | Sohoj IT (March 2025 – Present) | Part Time

- Co-developed the official University Management System for UGV (ugv.edu.bd).
- Built scalable web applications, REST APIs, and admin panels using Laravel, Filament PHP, and React.
- Engineered dynamic role-based access control (RBAC) and complex business logic for enterprise platforms.

Accountant & Inventory Management Officer | Asara Enterprise (July 2024 – Present)

- Managed end-to-end stock control and financial ledgers with 100% data accuracy.
- Digitized manual paper vouchers and sales/purchase records into structured electronic workflows.
- Conducted data reconciliation to resolve stock variances and financial discrepancies.

PROJECTS

University Management System (UGV) | [<https://ugv.edu.bd/>]

- Worked in a collaborative engineering team to build and maintain university academic & operational modules.

Multi-Depot Inventory System | [github.com/mustafiz-jr/depot-inventory-showcase]

- Developed a multi-location stock & ledger system using Laravel & React with RESTful APIs and analytics.

Nestique – E-Commerce Platform (Personal Practice Project)

- Repository: github.com/mustafiz-jr/nestique
- Built an open-source e-commerce application using Laravel & Filament PHP to practice Stripe API, variant stock management, and live chat features.
